

XOPHER (XP) POLLARD

PRINCIPAL SYSTEMS ARCHITECT & SYSTEMS SYNTHESIST

Tucson, AZ • 520-762-4947 • hello@xophz.com • linkedin.com/in/xophz • github.com/xopherdeep • xophz.com

EXECUTIVE PROFILE

A results-driven Principal Systems Architect and Practice Lead with over 25 years of experience designing, modernizing, and orchestrating mission-critical distributed infrastructure. Proven track record deploying automated, multi-tenant cloud and edge networks supporting 25+ production platforms processing 160,000+ aggregate monthly requests with 99.99% availability. Deep technical authority across Kubernetes, Infrastructure as Code (Terraform), event-driven streaming pipelines, sovereign protocol design (w4 Protocol), and modern browser-based spatial rendering engines (WebGPU). Adept at leading cross-functional engineering teams, eliminating technical debt, and translating ambitious business and scientific requirements into durable, self-healing platforms.

CORE ARCHITECTURE & ENGINEERING COMPETENCIES

- **Cloud-Native & Distributed Systems:** Kubernetes, Docker, AWS (20+ services), GCP, Terraform (IaC), Microservices, Multi-Tenancy, Zero-Trust Networking, Edge Caching, Sovereign Protocols (w4).
- **High-Throughput Data & Observability:** Event-Driven Pipelines, Asynchronous Queuing, Telemetry Streaming, REST/GraphQL APIs, Prometheus, OpenTelemetry, SRE Runbooks, Distributed Caching.
- **Full-Stack, Graphics & Spatial Computing:** TypeScript, Node.js, Python, C#, WebGPU/WebGL Shaders, Vue.js/Nuxt, React, Linux Internals, Distributed State Orchestration.
- **Agentic Systems & Architecture:** Disciplined Atomic Design (Atoms/Molecules/Organisms), Context-Isolated AI Agent Workflows, Prompt Architecture, Automated Self-Healing Runtimes.

FLAGSHIP APPLICATIONS & PLATFORMS DEVELOPED

- **YouMeOS (Spatial Web Operating System):** Architected browser-based spatial OS using Vue 3 and WebGPU rendering pipelines for dense volumetric 3D information spaces with steady 60 FPS performance.
- **Chemical X (Agentic AI & Engineering Standards):** Engineered architectural standards specification and AST hazard linter for deterministic, zero-regression agentic software development and tool-calling execution.
- **My Compass Consulting & Software Suite:** High-stakes technology advisory, enterprise legacy monolith modernization, and bespoke modular software engine engineered on rigid Atomic Design principles.

PROFESSIONAL EXPERIENCE

Managing Practice Lead & Principal Architect

12/2004 - Present

Hall of the Gods, Inc. / My Compass Consulting • Tucson, AZ

- **Federated Network Operations:** Architected, deployed, and manage multi-tenant edge infrastructure spanning 25+ active production web platforms, routing 160,000+ monthly requests with automated edge caching and 99.99% uptime.
- **Sovereign Systems & Platform Engineering:** Designed and delivered scalable, containerized client platforms and workflow engines (including BlackBOX self-healing nodes), reducing ongoing maintenance overhead by 75%.
- **B2B Systems Advisory:** Directed technical infrastructure engagements for commercial clients, conducting full-stack architecture audits, eliminating DNS and data bottlenecks, and migrating on-prem setups into secure cloud environments.
- **Next-Gen Spatial Computing:** Engineered browser-based spatial OS prototypes (YouMeOS), stress-testing WebGPU rendering pipelines and complex state coordination for dense volumetric information spaces.

Principal Systems Architect & Cloud Modernization Lead

12/2021 - 01/2026

Vi • Enterprise Cloud Modernization

- **Cloud Modernization:** Spearheaded enterprise transition from monolithic legacy systems to containerized cloud-native platforms on AWS and Kubernetes, sustaining continuous 99.99% availability without operational disruption.
- **Observability & Reliability:** Built automated SRE monitoring frameworks and APM telemetry pipelines, cutting incident mean-time-to-resolution (MTTR) by 45% and establishing strict on-call operational runbooks.
- **DevSecOps Standard:** Implemented multi-repository CI/CD automation and modular Terraform IaC frameworks, accelerating feature delivery velocity while enforcing rigid compliance and security boundaries.

Senior Software Architect (Data-Intensive Systems)

06/2015 - 10/2019

J.D. Mellberg Financial / Tracking First • FinTech Infrastructure

- **High-Throughput Data Pipelines:** Architected enterprise telemetry pipelines and distributed document databases, parsing and validating millions of transaction records in real time with near-zero latency and strict auditability.
- **Operational Cost Reduction:** Engineered dynamic analytics transparency layers and automated data validation services, eliminating processing redundancies and saving an estimated \$1.2M in annual operational waste.

PRODUCTION EXPERIENCE & VERIFICATION

25 years of self-directed technical mastery, production systems architecture, and distributed platform design. Consulting and corporate records verifiable upon request.
